FINANCINGS

On November 21, 2017, the Company entered into two \$125,000 secured, convertible, loan agreements with existing shareholders for demand loans for total proceeds of \$250,000 at an interest rate of 8% calculated monthly and payable annually. The loans will automatically renew for an additional three-year term until such time as the lender agrees to terminate the agreement. The lender also has the option to obtain interest and principal loan repayments in gold rather than cash should the Company reach commercial production while the loan remains in place. In that event, the gold is to be valued at US \$800 per ounce. The lender also has the right to convert the loan into units of the company's shares at \$0.05 per unit for a period of one year and \$0.10 per unit until maturity. Each share unit shall contain one common share and one common share purchase warrant which will entitle the holder to purchase one common share at a price of \$0.075 for a period of two years from the date of conversion

RESULTS OF OPERATIONS

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may be different from those estimates.

LIQUIDITY

The Company has financed its operations to date primarily through the issuance of common shares and the exercise of warrants and stock options. The Company will continue to seek capital through various means including the issuance of capital stock.

The Company is in the exploration stage. These financial statements are prepared in accordance with accounting principles to a going concern, which assumes that the Company will be able to realize assets and discharge liabilities in the normal course of business. The Company's ability to continue as a going concern is dependent upon the continued support from its directors, the ability to continue to raise the necessary financing to meet its obligations, and to achieve profitable operations in the future. The outcome of these matters cannot be predicted at this time. These financial statements do not reflect any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue in business.

The Company has no history of profitable operations and its mineral projects are at an early stage. Therefore, it is subject to many risks common to comparable junior venture resource companies, including under-capitalization, cash shortages and limitations with respect to personnel, financial and other resources as well as a lack of revenues.
